

Alberta Water Quality Awareness Day – Remember the lake LAST AUGUST?

So easy to do! Just sign up over the internet (www.awqa.ca) to have *Alberta Lake Management* send you a water quality testing kit. You choose the location, date and time to do these simple tests that can be done by students too. You'll measure temperature, water clarity, water ph and more. Once the testing is done, just email your results back. Results are posted in early September.

PLWA urges you to talk your friends and neighbours into doing it as well since AWQA can only accept one set of test results for each individual registered. We are hoping that you and your friends will coordinate testing throughout the summer. By doing this AWQA will have data on the water quality as the summer progresses. Help find a solution to the algae problem. Let's all hope we don't have to document results similar to last August!
