

Alberta Environmental Farm Plan Workshops – Free and Confidential

PLWA sponsors free Environmental Farm Plan (EFP) workshops to help farm or ranch owners implement best environmental practices. The workshops are also open to acreage owners and are of particular interest to those who generate an income from their property.

Information of the Environmental Farm Plan and the workshops is available at www.albertaefp.com

Several of the PLWA Board members have completed this free and confidential program and highly recommend it!

The workshop coordinators provide individual attention to help create an effective plan for both acreage and agricultural property owners.

To register for a workshop contact:

Dan Moe
District Program Coordinator
The Alberta Environmental Farm Plan Co.
