WELL**

**Clean water.
Well protected.**

And

Pigeon Lake Watershed Association

Presents

Working Well Workshop

**Lakedell Agricultural Complex Hall B at the south end of Pigeon Lake
6 p.m. Thursday, June 10, 2010**

Did you know that a poorly maintained water well can put your water supply at risk of contamination and reduce your well yield?

If you are one of 450,000 Albertans who use their water well for household purposes, the key to ensuring your water supply is safe and secure is knowing how groundwater works, learning about your well and understanding how to properly maintain it.

Proper water well siting, construction, maintenance and plugging will help protect your well from biofouling and contamination, save you costly repairs, and ensure your well water yields are sustained over many years.

Find out what you can do to protect your well. Attend the **FREE water well management workshop** being hosted by **the Pigeon Lake Watershed Association (PLWA)** and presented by the **Working Well Program**, with technical expertise provided by **Alberta Agriculture and Rural Development, Alberta Environment and Agriculture and Agri-Food Canada.**

During the workshop we will cover:

- Groundwater – how it works
- Water quality and quantity testing
- Well protection – protecting your well from contamination
- Basic well maintenance
- Water sampling – how to do it

To attend the workshop, please pre-register by calling **Trudy** at the **Pigeon Lake Watershed Association (PLWA)** Office at: **780-498-6198** or email trudyhf@shaw.ca. **Please provide your legal land description so we can look up the information to provide your personal well water report.**

The Lakedell Agricultural Complex is located near The Village at Pigeon Lake. Go West 29km along Highway 13 from Highway 2, then 1.5kms South.. Watch for signs.
